Annual Performance Report
Workforce Information
Program Year 2009
Guam

This report describes the work activities and accomplishments during the July 2009 to June 2010 program year as required by the Training and Employment Guidance Letter (TEGL) No. 30-08 Attachment V. This report outlines the progress in each of the following core products and services.

A. Accomplishments

1. Populate the Workforce Information Database (WIDb) Database with state and local data.

Staff continued to populate and maintain America's Labor Market Information (ALMIS) core and other ALMIS database tables beyond the core requirements. All Core tables have been populated to the extent that the programs and data exist on Guam. Updated Occupational Licensing databases were submitted to the National Crosswalk Service Center for placement on the ACINet site. Now Guam's occupational licensing information databases including licensed occupations and licensing agencies as well as other occupational licensing information can be viewed online as part of the national licensing information system. In addition to licensing information, other occupational information for Guam including the highest paying jobs by occupation is included and accessible through this site.

Tables of key interest such as building permits, employment, unemployment, wages, hours worked, average hourly earnings, number of persons employed by occupation, etc. in time series format from the ALMIS database information and presented it in Excel spreadsheets in response to customer information in that format.

Guam Data on O*Net Website

The screenshot shows a Mozilla Firefox browser window displaying the O*Net website. The address bar shows the URL: http://www.acinet.org/acinet/licensedoccupations/lois_state.asp?nodeid=16&by=occ. The page features the CareerOneStop logo and navigation links such as 'Explore Careers', 'Salary + Benefits', and 'Education + Training'. A search bar is visible with the text 'Site Search' and a 'go' button. Below the search bar, there are links for 'State Job Banks' and 'More Resources: America's Career InfoNet'. The main content area is titled 'Licensed Occupations' and includes a brief description of the tool. A sidebar on the left offers three search options: 'Search By Occupation', 'Search By Agency', and 'Search By Keyword'. The 'Search By Occupation' option is selected, and a dropdown menu shows a list of states and territories, with 'Guam' highlighted. A 'Next' button is located at the bottom right of the dropdown menu.

Baccalaureate Degree or higher from an accredited college or university to sit for the exam. B. You must have a Total of 150 credit hours* to qualify for issuance of CPA certificate. C. 24 credit hours must be in upper division accounting courses, including the following courses: > 3 credit hours in Financial Accounting > 3 credit hours in Auditing > 3 credit hours in Taxation > 3 credit hours in Management or Cost Accounting D. 36 credit hours must be in Business, which should include the following courses: > 6 credit hours in Economics > 3 credit hours in Finance > 3 credit hours in Business Law * NOTE: "credit hours" means a conventional college "Semester" hour. "Quarter" credit hours may be converted to Semester hours by multiplying by two-thirds (2/3)(e.g. 36 quarter hours equals 24 semester hours). EXAMINATIONS: APPLICATION AND FEES: A. You must pay a non-refundable application fee to the Guam Board of Accountancy with your examination application (please make check for the \$25.00 Application Fee payable to Treasurer of Guam). B. Examination Section Fees are paid to NASBA. These fees are paid only after Guam sends an Authorization to Test (ATT) to NASBA and you are billed. These fees may be paid online with a credit card to NASBA. Currently, these fees are: > Auditing and Attestation \$134.50 > Business Environment and Concepts \$100.50 > Financial Accounting and Reporting \$126.00 > Regulation \$109.00 (NOTE: The Prometric portion of the examination fee will increase as of July 1, 2005) C. A Guam Computer Testing Center Surcharge of \$100.00 per test section must be paid directly to NASBA by all candidates other than Guam residents. You may pay this fee at <http://www.nasba.org/nasbaweb.nsf/exam>. D. You may apply for one or more section(s) of the examination at a time. Now that Guam has populated ALMIS databases, they are accessible online where there is a national system to display them as noted above. However, for most of the databases, there is no national system for access and display. As the reader can see from the slides of a few of our populated database tables, the format is not suitable for use directly.

States, therefore, have either developed or contracted private vendors to provide search, access and display capabilities to make the user hostile database format accessible. Guam has reviewed the private vendor arrangements and found them to be expensive relative to the grant funding. Alternatively, the use of the ADAM system (Distributed Access Method) system under development by a consortium with North Carolina as the lead has had development delays and is not yet available outside of the test areas. Our follow up indicated that the Adam system is no longer under active development and is no longer an option for our current use. We have therefore again through meetings of the state labor market information directors in the region sought the technical assistance and support to use existing software already developed and in use by other states. We specifically requested such support from the state of Oregon and discussions are underway regarding implementation of a system to make the remaining populated Guam ALMIS databases available online in the Oregon format. This format provides information from a variety of the databases such as licenses, wages, training and more in response to searches for specific occupations. This capability provides very focused and user friendly and customized information for a person looking for occupational information. Funding for making the software changes needed to use the software on Guam has been identified under a Department of Labor, American Recovery and Reinvestment Act (ARRA) grant funding.

2. Produce and disseminate industry and occupational employment projections

One of the primary challenges of producing such information is the creation of an industry employment time-series database. As Guam does not have an unemployment insurance program and consequently the associated U.S. Department of Labor, Bureau of Labor Statistics, Quarterly Census of Employment and Wages Program (QCEW). In lieu of this Guam operates an Annual Census of Establishments survey program which provides the employer database for U.S. Department of Labor, Bureau of Labor Statistics cooperative statistical programs. The annual survey continues to be completed and during this program year, time-series employment data was compiled by Standard Industrial (SIC) industry categories and is available for 4, 3, 2 and industry division levels. This provides the foundation for producing industry trends using historical patterns. Conversion to the NAICS format to produce NAICS based industry formats is required for this program. The work to convert the historical time-series employment data from the SIC coding format to the NAICS format was undertaken this year and has been completed. There are substantial developments expected on

Guam in the future associated with plans to relocate approximately 8,000 Marines from Okinawa and equal number of dependents to Guam. This and other large scale defense construction plans as well as those of the local government and private industry has resulted in the need for specific plan and construction information which is now being collected systematically to support forecasts which involve substantial changes to employment beyond those shown in historical trend analysis. Work is proceeding on producing the projections. Due to the massive amount of information and uncertainty of the specific projects and the timing of projects related to the marine relocation substantial additional work is being performed to incorporate these changes into the projections now that the Record of Decision (ROD) has been announced in September 2010 providing a firm decision on the projects. A dry run of the long term projections input into the micro-matrix software to produce occupational projections. This trial revealed that a number of additional detailed industry projections needed to be made to make the industry projections from the long-term software to be compatible in detail to match up with the industry information in the occupational projections software. It also revealed some NAICS industry coding issues which were corrected. Trial occupational projections estimates were successfully run. Now the occupational projections software is ready to run final estimates pending updated industry control totals incorporating our assessment of the military buildup impact on the industry projections.

Guam continues to successfully operate the U.S. Department of Labor's Occupational Employment program which provides the database of occupational information required to develop occupational forecasts. Guam has obtained and is populating the long-term industry software to produce the long-term projections. The short-term projections software requires monthly time-series data. Guam does not have monthly time-series data. Discussions and work with the software trainers and developers to work through alternative approaches to producing the short-term projections overcoming the monthly data format input requirements were successful and that work is now underway. It is being coordinated so that the short-term forecasts are consistent with the long-term and incorporate the latest military buildup information.

3. Publish an annual economic analysis report for the governor and the SWIB.

An annual economic has been prepared and incorporated as a section into the Executive Budget each year. The FY 2010 Economic Outlook report fulfills this requirement. It has been provided to the Employment & Training administration in the required PDF format. We have also published other special reports. The impact of an increase in minimum wage and reports on safety and health statistics were published. One special study produced is a comprehensive report on federal expenditure trends was produced by the Department of Labor, Bureau of Labor Statistics. The Bureau of Labor statistics also produces time-series statistical tables on building permits and federal construction projects to produce leading information for future construction industry employment. The workforce information produced under this funding, has been incorporated and used in a number of special economic reports including the Draft and Final Economic Impact Statements regarding relocation of the Marines to Guam from Okinawa. It is also used in bond indenture documents for public bond financing.

4. Post products, information, and reports on the Internet.

All of the statistical reports produced by the Guam Department of Labor, Bureau of Labor Statistics are posted on the Department of Labor website at: www.guamdol.net Additionally, data produced in Federal/State cooperative statistical programs is posted on the respective federal agencies website so that data are available comprehensively as part of each national statistical program.

This funding provides the primary financial support for printing and decimation of occupational information products with both printing and on-line access. The publications of reports noted the milestones items including quarterly publication of the Current Employment Report, Annual publication of the Annual Census of Establishments, Annual Publication of an Economic Outlook report and Semi-Annual publication of the Occupational Employment and Wage Statistics reports have been accomplished as planned.

We provide Guam data on U.S. Department of Labor, U.S. Department of Commerce, America's CareerInfoNet and Department of Interior websites which provide data for states and territories including Guam as part of their respective statistical programs.

Bureau of Labor Statistics

Section 48056 of P.L. 9-238 established the research and statistics responsibility of the Bureau of Labor Statistics. It conducts independent surveys to study, investigate, collect and compile statistical information and issue reports of Guam's labor market conditions; these sections include the following:

- * Current Labor Force (CLF) includes statistics on employment, unemployment, and other characteristics of the specified civilian non-institutional population of Guam to ensure proper planning and development of appropriate labor programs.
- * Current Employment Statistics (CES) includes federally-funded state/local planning information; occupational employment statistics program; publishes current employment report; and publishes results of an annual census of Guam's employers.
- * Occupational Safety & Health Statistics (OSHS) produces statistical information to measure and evaluate the effectiveness of the Occupational Safety and Health Act in reducing work-related injuries and illnesses as mandated by P.L. 91-596, the Occupational Safety and Health Act of 1970 and is federally funded and operated in cooperation with the U.S. Department of Labor's Bureau of Labor Statistics.

Labor. The Governor of Guam is vested with the authority to issue temporary labor certifications on Guam if, after testing the local labor market, it is found that: qualified U.S. citizens or permanent residents are not available to perform the required services and that employment of a non-immigrant alien will not adversely affect the wages and working conditions of U.S. resident workers who are similarly employed on Guam. This temporary certification is issued by the Guam Department of Labor for a period of one year or less. Extensions may be granted for a period not to exceed three consecutive years. Minimum wage is set by the prevailing U.S. rates.

WORKFORCE & LABOR MARKET

Guam's total non-government employment reached 43,660 in December 2006. With the public sector included, employment level is at 58,860. The main contributors are: a) services, which account for almost 30% of the total annual payroll and; b) retail trade at about 20%. The single largest contributor, the services sector, employed a total of 15,820 people. Many of these jobs are directly related to tourism which is Guam's primary industry. It injects more than \$1.5 billion into the island's economy each year from its 1.2 million visitors. These figures are expected to grow in the coming years as new markets (Taiwan, Korea and China) are developed and as the Japanese economy picks up (Japan is the number one source of Guam's in-bound travel). Local hotels are currently renovating and/or expanding their facilities in anticipation of this surge. With a robust local tourism, it is no wonder that wholesale and retail trade provided the next most number of jobs at 14,080 in the same period. The next leading employer is the transportation and public utilities (8.5%) followed by construction at 7.44% or about 4,380 jobs.

As regards public employment, the above table shows that 1 out of every 5 employed people in Guam works for the territorial government. Federal employment accounts for 6% of the total island employment.

The population of Guam is relatively young with the median age of 27.4 years. In 2004, Guam's total civilian population 16 years and older totaled 99,783. The labor force participation rate is 62%, meaning there are 61,523 working age residents who are willing and able to work and are either employed or actively seeking employment. The employment ratio in the same period is 57%. Guam's unemployment rate is 4.72%, slightly higher than the U.S. national average of 5.6%. There is no unemployment insurance requirement.

Done

Guam's unemployment rate is 4.72%, slightly higher than the U.S. national average of 5.6%. There is no unemployment insurance requirement.

In terms of education, for school year 2005-2006, the University of Guam reported a total number of 370 graduates., 83% of whom were awarded an undergraduate degree while 17% earned a master's degree. The Guam Community College in 2005 reported a total of 10,268 enrollees. Twenty-three (23%) of whom were enrolled in certificate courses, 54% in continuing education classes, 17% were secondary students taking trade courses, and about 6% were in either an apprenticeship, journeyworker's or adult education programs.

Prevailing wage rates and labor laws in Guam are set, administered and enforced pursuant to 22 GCA "Guam Fair Labor Standards Act" which mirror that of U. S. federal labor laws (pursuant to section §101(a)(15)(h)ii of 8 U.S.C. 1186).

Guam Data on BLS Foreign Labor Certification Website

The screenshot shows a Mozilla Firefox browser window displaying the 'Foreign Labor Certification - Online Wage Library & Data Center' website. The browser's address bar shows the URL 'http://www.flcdatacenter.com/OesWizardStart.aspx'. The website header includes the logo of the Department of Labor, Division of Foreign Labor Certification, and the URL 'www.flcdatacenter.com'. The date 'Wednesday, January 30, 2008' is displayed. The main content area features the title 'Online Wage Library - FLC Wage Search Wizard' and a message: 'Data for 7/2007 - 6/2008 has been added and is effective as of 7/16/2007'. Below this, there is a dropdown menu for 'Select a State/Territory:' with 'Alabama' selected. A 'Continue' button is visible next to the dropdown. The page also contains several links and text blocks, including 'Please Code and the OES/SOC Occupation Code or Title try using the h.', 'July 15, 2007 - Job Zones updated October 2, 2007; see [change history](#).', 'FLC Data Center:', 'For Technical Support, please read the [FAQ](#) page.', and 'The Wage Library and Data Center is developed and maintained by the [State of Utah](#) under the [Department of Labor, Division of Foreign Labor Certification](#). If you have any questions, please contact the Data Center Administrator. Your comments would be sent to gray@utah.gov.' The browser's status bar at the bottom shows 'Done'.

5. Partner and consult on a continuing basis with workforce investment boards and key workforce and economic development partners and stakeholders.

Guam has one Workforce Investment Board. Various members individually request and receive information and reports primarily by e-mail as requested. The board is periodically provided reports and statistical information separately or as part of other information to support various activities. The milestones have been accomplished as planned. The agency director meets with the Workforce Investment Board regularly. The Chief Economist is a member of the Guam Community College's Taskforce for Vocational Education State Plans and serves as a member of the Visitor's Bureau research committee as well as participates in Guam Economic Development Authority (GEDA) meetings and discussions regarding the buildup and public finance.

6. Conduct special studies and economic analyses.

Aggregate statistics such as gross domestic produce for the government's revenue forecasting are desired and input into that process has been made and GDP estimates for Guam have since been published by the U.S. Department of Commerce, Bureau of Economic Analysis. The publications of reports includes quarterly publication of the Current Employment Report, Annual publication of the Annual Census of Establishments, Annual Publication of an Economic Outlook report and Semi-Annual publication of the Occupational Employment and Wage Statistics reports have been accomplished as planned.

Domestic Products estimates for Guam by the Bureau of Economic Analysis. The Chief Economist was appointed by the Governor as a member of the 2010 Census of Population and Housing for Guam.

B. Customer Consultations.

The facility for customer feedback exists on the Department's website. Feedback is solicited in formal training or workshop sessions. Customers frequently contact and meet with us regarding the information available and what is desired for their projects. One need identified is employment information with greater geographic detail and fringe benefit information. More accurate and consistent unemployment statistics are needed along with the associated income statistics.

C. Recommendations for Improvements or Changes to the Deliverables

In producing the deliverable requirements, special consideration needs to be given to the non-state areas. Funding is vitally needed. However, due to the fixed costs and complexity of implementing this array of programs a higher base level of funding is needed. Also to consider providing additional centralized assistance with providing ready to use software such as Workforce Informer or other state ALMIS display software with central coordination and support for island areas rather than each area reinventing the system which is not possible or cost effective.
