Workforce Investment Act Areas

Introduction

Each year, in cooperation with the Federal Bureau of Labor Statistics the Labor Market Information Department, a unit of the Mississippi Department of Employment Security, conducts an occupational wage survey of businesses across the state. The data from that survey are then input into special software which produces long term projections of occupational needs for various areas of the state. Complete results of this survey are published at our agency website (cited throughout this publication). One significant output of this process is a count of annual demand for workers by specific occupation.

Occupations in Demand takes a look at this annual demand, which includes both new and replacement workers, to highlight those occupations with the highest need for workers. Various tables show selected occupations sorted by annual need, by average wages paid, and by job zone. Job zones are an indication of how much experience, education or training are needed to qualify for that particular occupation. The final table in the series highlights those jobs which LMI staff view as the “hottest” occupations across the state. These were found by a combination of annual demand and wages paid, a process explained in further detail within that section.

It is hoped that the data contained in this publication will be helpful for job seekers, training providers, public officials and economic developers across Mississippi. Should you require further information or need assistance in interpreting the information found within, please do not hesitate to contact the LMI Department for guidance.

Explanation of Terms

SOC Code- Standard Occupational Classification code, an occupational classification system devised by the U.S. Department of Labor with input from the states. It is the federal standard, and should be used by all state and federal agencies dealing with occupational data.

Occupational Title- The standard title assigned to a specific occupation under SOC.

Annual Demand- The projected number of workers needed on an annual basis for the years 2010 through 2020, as determined by the occupational projections data. It includes both new workers and replacements for those who leave or change occupations.

Average Wage- An estimate of average hourly or annual earnings for all workers within a specific occupation regardless of experience level. This should be viewed as an estimate of potential earnings rather than as an entry level wage for the inexperienced worker. Certain salaried occupations, such as teachers, are generally paid a monthly or annual salary and may not show an hourly wage estimate.

Entry Level Wage- An estimate of average hourly or annual earnings for the new or inexperienced worker within a specific occupation. These are wages which a person just starting out in an occupation could reasonably expect to earn. Certain salaried occupations may not show an hourly wage estimate.

Job Zone- These indicate the most common level of education, training, and/or experience required to perform the job and come from the O*Net system developed by the U.S. Department of Labor. The higher the number, the more education, training or other preparation is required.

General Trends

Based on statewide estimations, roughly 33,865 new and replacement workers will be needed on an annual basis over the next several years. The distribution of this demand across the various occupational sectors is somewhat irregular, with a handful of sectors dominating the overall needs. Anticipated earnings across the various job groups are also quite varied and worthy of further analysis.

Among the 22 occupational sectors, the largest annual demands should be found in the areas of Sales & Related and Office & Administrative Support occupations. However, in both cases the expected annual wages for jobs in those sectors will generally be below average. The fewest number of new and replacement workers can be expected in Legal occupations, but those should have the second highest earnings potential.

Management occupations may perhaps be considered a “hot” sector, with above average annual earnings of \$77,970 to lead all sectors. Other occupational sectors with above average annual earnings that also have above average demand for workers include Education, Training & Library and Healthcare Practitioners & Technical occupations.

Several other sectors with high demand for workers show below average wage rates. Some of the sectors with the least need for workers are listed among the highest paying sectors. There should be enough opportunity for employment for incoming workers, provided that wages are not a major concern.

Mississippi

Summary of Occupational Sectors

SOC Code	Occupational Sector	Annual Demand	Entry Level Wage		Average Wage	
			Hourly	Annual	Hourly	Annual
	Total, All Occupations	33,865	\$8.52	\$17,720	\$16.72	\$34,770
11-0000	Management Occupations	1,290	\$18.62	\$38,730	\$37.49	\$77,970
13-0000	Business and Financial Operations Occupations	780	\$14.86	\$30,910	\$25.82	\$53,710

27-0000	Arts, Design, Entertainment, Sports, and Media Occupations	340	\$9.64	\$20,050	\$18.08	\$37,600
29-0000	Healthcare Practitioners and Technical Occupations	2,805	\$13.92	\$28,940	\$28.42	\$59,120
31-0000	Healthcare Support Occupations	1,345	\$8.09	\$16,820	\$10.24	\$21,300
33-0000	Protective Service Occupations	825	\$9.19	\$19,100	\$14.29	\$29,730
35-0000	Food Preparation and Serving Related Occupations	3,610	\$8.10	\$16,850	\$9.05	\$18,820
37-0000	Building and Grounds Cleaning and Maintenance Occupations	955	\$8.11	\$16,860	\$10.06	\$20,930
39-0000	Personal Care and Service Occupations	1,065	\$8.09	\$16,820	\$10.75	\$22,350
41-0000	Sales and Related Occupations	4,300	\$8.19	\$17,040	\$13.64	\$28,370
43-0000	Office and Administrative Support Occupations	4,250	\$9.05	\$18,830	\$13.75	\$28,600
45-0000	Farming, Fishing, and Forestry Occupations	135	\$8.82	\$18,340	\$14.43	\$30,020
47-0000	Construction and Extraction Occupations	1,225	\$10.82	\$22,510	\$16.71	\$34,760
49-0000	Installation, Maintenance, and Repair Occupations	1,335	\$10.75	\$22,350	\$17.77	\$36,960
51-0000	Production Occupations	2,560	\$9.10	\$18,920	\$14.32	\$29,780
53-0000	Transportation and Material Moving Occupations	2,640	\$8.45	\$17,570	\$14.16	\$29,450

High Demand Occupations

Looking at the occupations most in demand over the next ten years, one finds a general lack of consistency regarding demand versus wages paid. When the level of preparation required to obtain these jobs is considered, the trend is even more confusing. The jobs expected to require the most new and replacement workers often pay below average wages and require little or no advanced preparation.

Among the top 100 occupations in demand, only about thirty-five can be expected to pay more than the statewide average of \$34,770 annually. There are some notable exceptions to this general trend, such as Registered Nurses and Elementary School Teacher, Except Special Education. Both of these require substantial education or experience and pay well above the statewide average.

Among the top twenty occupations in demand, other occupations that have above average wages are Truck Drivers, Heavy & Tractor Trailer; First Line Supervisors/Managers of Retail Sales Workers and administrative Support Workers; Secondary and Middle School Teachers, Except Special and Career/Technical Education.

A look at level of preparation required reveals that fifty-three percent of the top 100 occupations will require little or no formal training (Job Zones 1 and 2). Slightly more than Forty percent of them will require moderate to long term preparation (Job Zones 3 and 4). Only six of the Top 100 Annual Demand Occupations are in the Job Zone 5 Category that requires extensive education and/or experience.

About Job Zones

Job Zones are utilized by the Occupational Information Network (O*Net) system to ascertain the level of training and/or preparation required for each occupational title. A brief description of requirements for each of the five Job Zones follows:

Job Zone One: Little or No Preparation Needed

No previous work-related skill, knowledge, or experience is needed for these occupations. Employees in these occupations need anywhere from a few days to a few months of training. These occupations involve following instructions and helping others. These occupations may require a high school diploma, GED or a formal training course to obtain a license.

Job Zone Two: Some Preparation Needed

Some previous work-related skill, knowledge, or experience may be helpful in these occupations, but usually is not needed. Employees in these occupations need anywhere from a few months to one year of working with experienced employees. These occupations often involve using your knowledge and skills to help others. These occupations often require a high school diploma and may require some vocational training or job-related courses.

Job Zone Three: Medium Preparation Needed

Previous work-related skill, knowledge, or experience is required for these occupations. Employees in these occupations usually need one or two years of

informal training delivered by experienced workers. These occupations often involve using communication and organizational skills to coordinate, supervise, manage, or train others. Most occupations in this zone require training in vocational schools, related on-the-job experience, or an associate's degree.

Job Zone Four: Considerable Preparation Needed

A minimum of two to four years of work-related skill, knowledge, or experience is needed for these occupations. Employees in these occupations usually need several years of experience, on-the-job training, and/or formal training. Most of these occupations involve coordinating, supervising, managing, or training others. Many of these occupations require a bachelor's degree, but some do not.

Job Zone Five: Extensive Preparation Needed

Extensive skill, knowledge, and experience are needed for these occupations. Many require more than five years of experience. Most employees in these occupations will already have the required skills, knowledge, work-related experience, and/or training. These occupations often involve coordinating, training, supervising, or managing the activities of others to accomplish goals. A bachelor's degree is the usual minimum formal education required for these occupations, but a significant number of them require post graduate studies and/or advanced degrees.

Determining the “Hottest”

A variety of methods could have been used to determine which occupations might prove to be the most attractive. Assuming that any person seeking work in a particular occupation would want to ensure that there would be at least moderate demand and reasonable wages for workers in that field, a method of indexing these factors was devised. For purposes of this publication, a simple method of indexing desirability was used.

The average annual demand for workers among all occupational titles was approximately 48 workers annually. The average annual wage for all surveyed occupations was found to be approximately \$34,770. For starting wages the average was determined to be about \$17,720. As a first step, any occupation with below average demand or not paying average or above wages was eliminated. To arrive at the “Hot Factor” used for ranking the remaining occupations, the annual demand for that occupation was divided by the overall average of 48.

Then the average annual wage for each occupation was divided by the average of \$34,770 and the starting wage was divided by \$17,720. The three “indexes” derived from these calculations were then added together to obtain the “Hot Factor”. For example, if a certain occupation had an annual demand of 1,360 persons, the first “index” would be 1,360 divided by 48, or 28.3. If that same occupation had an annual wage of \$58,097, the second “index” would be \$58,097 divided by \$34,770 which equals 1.67. If the entry wage was \$42,510, then dividing \$42,510 by \$17,720 would yield 2.40. Adding the three “indexes” together would produce a “Hot Factor” of 32.37 which would have placed it among this year’s hottest occupations.

Generally speaking, any occupation with above average demand and above average wages would be a candidate for inclusion in this list. Higher wages might offset lower demand or vice versa, but the end result should still yield a reasonable approximation of the most desirable occupations.

Exploring Occupations Further

Although the focus of this publication is on those occupations most in demand, the LMI Department has data available on literally hundreds of other occupations. Visiting our website at mdes.ms.gov will open the doorway for other information about occupational trends across the state and substate regions. In addition, the U.S. Department of Labor has developed a system for occupational exploration known as the Occupational Information Network, or O*Net for short.

This system is free to all users with internet access, requires no special software and is very user friendly. It can be accessed online at <http://online.onetcenter.org>. The O*Net system is an innovative tool for finding out all sorts of pertinent information about a particular occupation. Users can find a wealth of information about skills required to succeed in a particular occupation, common tasks performed, and working environments.

The system utilizes the same SOC code found in this document, but it also uses keywords and partial job titles to help people select an occupational field of interest. O*Net will even provide a list of related occupations for any job title chosen, so as to expose the user to a broader range of possibilities. Used in conjunction with this publication, O*Net should become an invaluable tool for those involved in guidance counseling, or for anyone desiring to expand their knowledge of occupational information.

Any questions about O*Net or anything else contained in this document should be directed to the LMI Department of the Mississippi Department of Employment Security.
