The U.S. Department of Labor's TAACCCT grant program is a major investment in building the capacity of community colleges. Grant funds are not used for tuition, but to create or enhance programs of study that lead to industry-recognized credentials, upgrade equipment, support student success toward completion, and more. TAACCCT supports colleges to better serve workers eligible for training under the TAA for Workers program, as well as a broad range of other adults.

Examples from Kansas

Industry Emphasis of Programs of Study

To find free and open career and technical training resources produced by colleges using TAACCCT funds, visit <https://www.skillscommons.org/>.

Kansas Example: The Technical Retraining to Achieve Credentials (TRAC-7) consortium developed and uploaded [syllabi, courses, manuals, and other learning materials](#) for subjects including electric power, agri-biotechnology, and environmental technology.

"TRAC-7 [Technical Retraining to Achieve Credentials] and KanVet recently partnered to further advance the educational and employment opportunities for Kansas Veterans and their families. This collaborative effort is currently building a stronger Kansas workforce and benefiting Service Members from across the State. I encourage military members to take advantage of KanVet website resources and to consider TRAC-7 signature programs when seeking educational paths to excellent career opportunities."

*Lee E. Tafanelli, Major General, Kansas National Guard
The Adjutant General*

"A Kansas Technical Retraining Among Interdisciplinary Networks (KanTRAIN) project participant completed an Associate of Applied Science (AAS) in Welding and made a career change from food service to master welder starting at \$19/hour. Another participant completed the Industrial Automation AAS; with his diverse background in robotics, he gained employment as an adjunct instructor at \$30/hour. A third...completed the Climate & Energy Control AAS and went from unemployed to HVAC technician at \$15/hour."

*Debra Mikulka, Project Director, KanTRAIN
Washburn University of Topeka*
